

## PRESS RELEASE

December 2, 2016

### **BLUESEAL<sup>®</sup> a success worldwide: Over 1 billion PVC-free closures sold**

In early November 2016, Pano Verschluss GmbH, the specialist for PVC-free jar closures, exceeded the 1 billion mark in sales of BLUESEAL<sup>®</sup>! The ecologically exemplary innovation that does without PVC has sustainably established itself in the market.

With its resource-conserving BLUESEAL<sup>®</sup> jar closure, featuring a sealing compound that does not contain any plasticizers in contrast to conventional closures, Pano fulfils the demands of organic food manufacturers and retailers to a particularly high degree. At the same time, the closure satisfies the understandable desire of consumers for perfectly safe packaging.

The demand for BLUESEAL<sup>®</sup> is growing and growing. As a consequence, from 2017 Pano will be manufacturing its PVC-free products on five production lines. To be able to make sufficient quantities of material available at the prefabrication stage, an additional painting line has already been put into operation in the new production building.

Pano will be presenting its PVC-free closure on February 15-18 at BIOFACH 2017, where Pano's experts will be on hand to answer questions about the compound used for BLUESEAL<sup>®</sup>, the BPA-NI interior coating, usage of the closure for various oil-based or acetic fillings, and regarding the technical requirements for jar filling lines, etc. In particular, Pano also advises manufacturers on how to switch from conventional to PVC-free closures to smoothly pave the way for their usage in future.

You will be able to find Pano at BIOFACH in Hall 9, Booth 335C, at the joint booth with the Schleswig-Holstein Ministry of Agriculture.
